Charlie Barrows Defends Dissertation

Submitted by Jim R Earnshaw on March 16, 2017 - 1:40pm

Congratulations to Charlie Barrows, who defended his Ph.D. work “Helping Observe and Tune Diffusing Using Mn $^{2+}$ Photophysics in Inorganic Nanocrystals after Growth” on March 16, 2017. He was a student in Professor Daniel Gamelin’s laboratory for the past five years. In the fall, he will begin teaching physical chemistry at Whitman College as a Visiting Assistant Professor. Until then, he is catching up on some overdue napping, camping, and playing music.
