

## DOCUMENTATION OF FIRST AID PLAN - CHEMISTRY

Department, organization, or unit name: Chemistry

Location(s) covered by this plan: Bagley Hall, Chemistry Building, Chemistry Library Building

### This First Aid Plan is for the following type of work environment:

- ☒ Office ☒ Laboratory ☒ Shop or Warehouse ☐ Remote Location  
☐ Other (explain):

### Chemistry has chosen the following as our plan to provide quick and effective first aid to personnel at the location(s) listed above (check the appropriate box below):

- ☐ We will rely on our local municipal emergency response service to provide first aid.\*  
☒ All Researchers, TAs, and support staff will receive first aid certification every two years at trainings provided by the Department of Chemistry  
☐ We have a specialized procedure for ensuring quick and effective first aid is available to our personnel (describe below):

**Location of the first-aid supplies:** BAG 109 (front office), BAG 271 (Undergraduate Stockroom), BAG 036 (Research Stockroom), and **all** functional lab spaces.

**Plan for personnel who work alone outside of normal business hours** (describe your plan for these individuals to obtain emergency assistance):

All researchers that are working in chemical labs must have a research partner working in the same lab space at all times.

**This First Aid Plan was last updated:** 7/6/2023

**For questions regarding this plan contact:** Eric Camp ([ericcamp@uw.edu](mailto:ericcamp@uw.edu))

*\*Note: If your work environment is a laboratory, shop, or warehouse or personnel conduct confined space entry, welding, scuba diving, and electrical power construction, generation, transmission, and distribution they are required to be first-aid and CPR trained and cannot depend upon local municipal emergency response. You will need to ensure that first-aid trained personnel are available on site when personnel are present.*
